Software Projects

Aston Waikiki App

[GitHub Repository](#)

- React Native app I created to reimagine the hotel Aston Waikiki Beach's website into a cross platform mobile app
- Utilized both Bottom Tabs, Drawer navigation and other React Native dependencies to create a better user experience when navigating through the app

Barcelona Travel App

[GitHub Repository](#)

- React Native app for visitors of Barcelona to save their pictures and locations of their favorite places
- Implemented Bottom Tabs navigation and pop-up modals for users to quickly get information on popular sights and restaurants
- Used geolocation with google maps so users can save their location or select it on a map
